Guest Speaking (40-60 minutes)

Guest Speakers are professionals who visit students in a school setting. Guest Speaker visits are a critical and valuable component of the curriculum and provide a foundation to the students' career awareness. Guest speakers discuss what they like about their jobs, their typical work day, and knowledge and skills required to pursue and be successful in their career. Speakers might also be asked to discuss a specific expertise they have in their field or speak on a specific topic. These visits also give students a chance to ask questions, practice professional behavior, and to evaluate their comfort level communicating with professionals.

Check the box below if Guest Speaking interests you.

Yes I would love to be a Guest Speaker.

Assisting with a Classroom Project (40-60 minutes)

The culminating project is a required course assessment component for students for each course. The classroom project demonstrates students' ability to apply the knowledge and skills they have learned throughout a course in an authentic way that is relevant to their academy's industry theme. At times, we will request a volunteer to assist students in certain

September 2018

- c. Date: SKELETAL SYSTEM 9/25/18-10/3/18
 - A. Description: Someone to explain how skeletal injuries and disorders affect the functioning of bones and joints.

CULUMINATING PROJECT DESCRIPTION

In this project students develop public service announcements (PSAs) to inform a targeted audience about a condition affecting one of the body systems they have learned about in this course. Each PSA includes a PowerPoint slide with a visual that captures the attention of the intended audience and a one-minute narration covering the important points about the condition in an engaging way.

The driving question for the project is, "How can we, as health professionals, create an effective public service announcement about a condition affecting a body system?"

Students choose a condition from a recommended list or one that satisfies criteria that ensure the condition is appropriate for a PSA. Working in groups of three or four, students write reports that provide a

REQUESTS FOR THIS CLASSROOM

Short Description:

REQUESTS FOR POSSIBLE FIELD EXPERIENCES

- 1) Give students opportunity to observe the human Muscular and Skeletal systems up close.(MCW Gross Anatomy lab)
- 2) Also possible option Neurological testing lab.
